Backed by ADG's unrivaled expertise

As an innovator with over 50 years of product design, manufacturing and engineering experience, ADG's advances in passenger safety and ride technology have quickly made their mark on mountains across North America.

Our state-of-the-art equipment, experienced product managers and unmatched design & installation capabilities will provide you with solutions that efficiently and effectively maximize the versatility of your terrain and get you up and running faster.

THE COMPLETE PACKAGE

At ADG we understand the investment you are making when you decide to purchase and build a Mountain Coaster or Slide. And we want to make sure you have the perfect ride, designed specifically to fit not only your terrain but your business operations as well.

Only ADG Mountainsides provides a **complete package for your total project needs.** We work with you to develop the best project plan tailored to meet your needs, from construction timelines and budget constraints, to support buildings and foundations, to guest interaction and ride excitement.

And all of our coaster & slide packages come inclusive with the additional engineering documents you need for the buildings, decking, and foundations for a complete ride build-out. No hidden costs. No surprises down the line. Just a complete project plan you can trust.

"THE ADG MOUNTAIN COASTER & SLIDE
ARE NOT JUST **AMAZING RIDES**,
THEY ARE ALSO **KEY COMPONENTS**
OF OUR BUSINESS PLAN."

Camelback Mountain Resort

A woman with long blonde hair, wearing a pink beanie, goggles, and a green jacket, is smiling while riding a blue mountain coaster car. The background is a snowy mountain slope. The text 'MOUNTAIN COASTERS' is written vertically in large white letters on a green background.

COAST YOUR WAY TO SUCCESS

FASTER & EASIER INSTALLATION PROCESS

Get up and running faster with ADG's Site-Ready Assembly. Your mountain track sections arrive on site in pre-assembled sections ready to be installed which means less time working on your mountain and more time operating your ride. Factory certified welders pre-fabricate ADG's stainless steel mountain coaster track system in-house resulting in a simpler 'bolt-up' field installation process.

CUTTING EDGE SAFETY & INNOVATION

ADG was first to market with their proprietary **SmartCart™ Technology**, a complete system that brings the latest innovations and technological advances to the forefront for a better ride experience.

Position Monitoring System™ automatic Eddy Current Speed Restrictors help carts remain a safe distance apart.

ComfortSeat™ Design a wider more ergonomic seat to better fit two adults for a more enjoyable ride experience.

On-Board Audio™ create your own customized location-triggered soundtracks for a ride experience like no other.

100% AMERICAN-MADE EXPERIENCE

With ADG you get 100% Made-in-America quality products and service.

From the design, engineering and welding of your track, to considering every aspect of development from terrain slope, to local ordinances and land usage, to guest traffic patterns, we ensure that your new ride is built to optimize every aspect of your mountain operation.

RIDE

MOUNTAIN SLIDES

SLIDE

EASY MAINTENANCE

ADG's Mountain Slides require minimal maintenance, and both our in-ground and above-ground solutions can accommodate a variety of terrains with low environmental impact.

The ability to bury the slide in an existing ski slope and blow snow over top eliminates the need for removal when transitioning from summer to winter operations for easier upkeep and maintenance.

SLIDE YOUR WAY TO A NEW ADVENTURE

BUILT FOR FUN, ENGINEERED FOR SAFETY

The completely redesigned ADG Mountain Slide takes everything you remember about this universally appealing summer attraction and makes it even better. With an improved fiberglass track system and new rider-controlled sleds, guests of all ages can easily control their speed and create the experience that is perfect for them.

NEW ADVANCED DESIGN

ADG's non-abrasive fiberglass track construction improves ride performance by providing a smooth surface that heightens the sensation of speed while eliminating injuries inherent with older, poured concrete slides.

- **Revamped Mountain Sled** adds rear wheels that follow the curvature of the track and eliminate fishtailing.

- **Patented Speed Restrictors** increase rider safety without negatively impacting the enjoyment of the ride.

- **Deeper Side Track Channels** improve maneuverability and rider control through straightaways and turns.
